

KME 44th Biennial National Convention
Hosted by New York Rho Chapter at Molloy University
April 14 – 15, 2023

Guidelines for Abstract Submission

Who May Submit an Abstract?

Any undergraduate or graduate KME member may submit an abstract for consideration as a talk at the national convention. The abstract may be co-authored. If it is selected for presentation at the convention, it must be made by one or more of the authors.

What are Appropriate Subjects for Proposal?

The material should be within the scope of understanding of undergraduates, preferably those who have only completed differential and integral calculus. (Projects prepared for capstone courses have been the basis for excellent presentations in the past.) The Abstract Selection Committee will naturally favor abstracts within this limitation, and which can be presented with reasonable completeness within the time interval. Abstracts should fall into one of the following areas: Original research by the student(s); Exposition of interesting but not widely known results; Use of technology to engage students in the classroom and promote the study of mathematics.

How Long Should an Abstract Be?

The abstract should be no more than 500 words. It should serve to summarize a presentation of about 20 minutes. (The Abstract Selection Committee can adjust the time length if requested by the student.)

How Should an Abstract Be Submitted?

Abstract and a cover letter are to be submitted via email to Dr. Deborah Upton or Dr. Manyiu Tse at nyrho@molloy.edu by February 17th, 2023. The cover letter should include the title of the abstract, the student's name(s) (which should not appear elsewhere in the abstract), student's address and e-mail, student status (graduate or undergraduate), and a statement that the author is a member of Kappa Mu Epsilon, duly attested to by the corresponding secretary of the student's chapter.
